ECHO SOURCING

OUR STUDIO

We are a design-to-delivery garment supplier working with major fashion retailers across Europe. Based in our UK and Bangladesh offices, our passionate, talented and experienced team of fashion designers, product managers and supply chain experts are responsible for delivering consistently high standards.

TREND & FORECAST

With our understanding of trends, we are able to recommend colours, fabrics, prints and shapes. A platform that helps us provide our clients with confident insights to make the right decisions.

SHAPE DESIGN

With a track record for innovation, we play on our strength and capabilities to provide the exceptional standard of design for our customers and helping them to achieve their vision.

WOMENSWEAR: FASHION

The new fashion statements are still very much about the button & buckle details, seen via a variety of textures from matt, wooden, coconut & horn effects.

Fabric texture continues to elevate novelty stripes standing out further when incorporated with twists & ties.

WOMENSWEAR: FASHION

Shirring has been built into the core elements of the fabric, resulting in a modern-look; as we experiment with variagating widths and yarn-dye stripes running into it's lengths.

Hardware trims feel newer, updating crop shapes and showing off exposed poppers & plastic-coated zips.

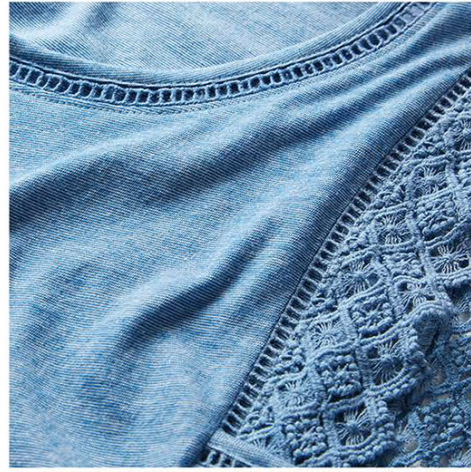

WOMENSWEAR: FORMAL

Adding value to a product line, by working fabric construction & manipulation into drapey fabric bases to emphasise truly feminine looks.

Visual attraction defines the fabrics at play, such as velours, lace and textures.

WOMENSWEAR: LIFESTYLE

Distinguishing details emerge with the use of lace trims, embroidery, scallop-edging and distinct stitches, applied to lift the aesthetic perception of this product area.

Fabrics remain key as innovation is coupled with super essential washes.

WOMENSWEAR: DRESSES & JUMPSUITS

This expanding category sees itself refreshed across a number of key trends into key jersey-line fabrics. Moving a step further with the Co-ordinate set area. Comprising of novelty textures, ribs and retro-crochet stripe fabrications.

WOMENSWEAR: DRESSES & JUMPSUITS

This expanding category sees itself refreshed across a number of key trends into key jersey-line fabrics. Moving a step further with the Co-ordinate set area. Comprising of novelty textures, ribs and retro-crochet stripe fabrications.

WOMENSWEAR: AOP

Showcasing our strength with high-quality digital and sublimation technology. Hand-drawn print techniques are coupled with versatile creatively-styled garments. Appealing to a broad range of customers with the innovative use of AOP design. Creating a visual impact when applied to textural fabric bases.

WOMENSWEAR: LICENSE & GRAPHICS

With access to the latest trending graphics, our fashion forward team combine license, original artworks and directional shapes to elevate the casualwear product, therefore, the popularity of the graphic product continues to evolve. Super soft sweats with quality hand feel to printed garments.
